

Learning Dutch

I am currently following the Dutch language course provided by Student+. Last semester, I successfully completed level A1, and now I am working on level A2. My goal is to continue with level B1 next year and become fluent in Dutch by the end of my studies. I believe that learning Dutch will improve my job prospects and help me integrate better into daily life. I could easily tell from the career day I attended that knowing Dutch helps a lot with finding a job. It is always beneficial to speak the local language outside of work, as people generally prefer communicating in their native tongue in places like supermarkets, restaurants, and other shops.
