

Active on LinkedIn

Throughout the semester, I made a conscious effort to expand my professional network on LinkedIn by connecting with peers, instructors, and industry professionals I met at various events.

Fontys University of Applied Sciences

I also actively explored internship opportunities for Semester 5 to gain a better understanding of the career paths available in ICT and Media Design.

To keep my LinkedIn feed active and to document my thoughts, I shared brief reflections on some of the events I attended / milestones I achieved. I believe these posts will serve as a valuable record of my growth over the years and a source of motivation as I look back on them in the future.

Looking ahead, the direction I take for my internship will largely depend on how my App Design semester unfolds. I'm currently leaning toward either a branding or development internship, though I remain open to other opportunities that may align with my interests and skills.
